

DIGITAL PUSH

Project

SUMMARY

In response to the rapid advancement of technology and the COVID-19 pandemic's impact on the digital economy, it is imperative to prioritise the inclusion of people with disabilities. This project seeks to mitigate the challenges faced by individuals with disabilities in the digital realm by emphasizing accessibility, digital skills development, and employment prospects, with the ultimate goal of narrowing the digital divide and fostering equal opportunities for their integration into the labor market.

SITUATION

The lack of global data on digital skills among people with disabilities is concerning, given the increasing demand for digital skills. To bridge this gap and secure access to emerging digital job opportunities, individuals with disabilities must acquire new skills and enhance their competences, considering their typically lower education and training levels.

OBJECTIVES

- Development of the theoretical and practical material to use by teachers, professionals and volunteers who works with IDPs
- Development of digital labs (practical methodology for learning the digital tools developed in the manual)
- Local training activity

RESULTS

Digital PUSH manual: consist of development of the theoretial material to be used by the teachers or volunteers and IDSPs. This will include a testing phase of all the materials and the development of a manual at the end of the PR1

Digital Labs: In this result we will develop the practical part of the project. Once defined all the theory in the manual "The digital push". We will have to study and develop the way in which the intellectually disabled persons acquire the practical knowledge of the first phase.

KICK-OFF MEETING

The kick-off meeting took place in Seville, Spain, on 21 of April 2023. During the meeting, which was hosted by Forum and Madariaga at the Madariaga Headquarters, we went through many aspects of the project, the representatives of both countries discussed how the project was going to be approached, the first steps to be taken and the work-packages it consists of. We also had a chance to discuss the different meetings, where they will take place and the possible dates.
